

Life, Safety, Security and Peace of Mind.

Keypads

For over 30 years, FBII has been protecting millions of homes and businesses just like yours. Our keypads are the most attractive, convenient and simple to use in the security industry. We base our reputation on it.

Protecting What You Value Most.

Security that's simple

Arming your security system has never been easier. Simply enter your 4-digit user code and exit the premises. Your home or business is now secured.

- Clear LCD display shows your system's status at a glance with easy to read plain-English messages.
- Soft backlit keys illuminate for greater visibility at night.
- If you accidentally cause an alarm, simply enter your four-digit user code to cancel. Nothing could be easier.

- **STAY + Your Code**
Arms your system while allowing you to move freely within your home.
- **BYPASS + Zone Number**
Turns off a specified sensor so that you can leave your door or window opened, while the rest of your home remains protected.

Be sure to ask your security consultant to explain the various other convenient functions available with your FBII keypad, such as adding additional user codes to give family, friends, employees or service

people access to your home or business. Additional options include dedicated emergency keys for fire, police and personal emergency conditions, paging, stay and instant arming, and chime by zone.

Our keypads are designed with style and comfort in mind...

FBI offers convenient accessories that make operating your security system simpler than you ever imagined. The Chatbak-V, used alone or with a variety of our wireless remote keyfobs, will enable you to operate your security system with a touch of a button. Nothing could be easier.

Your Authorized Dealer

Accessories

The easiest way to use your security system...with the touch of a button.

Experience ease and simplicity when you use FBI's wireless remote keyfobs alone or with the Chatbak-V. Your security system has never been easier or more convenient to use.

Alarm on/off, garage door open/close, gate open/close, turn lights on/off, panic emergency buttons and much more.

Chatbak-V

The ChatBak-V voice status module provides complete verbal status for your FBI security system.

"Back door"

"Went to the market, be back at 6 o'clock"

"Armed away, exit now"

Ask your Security Consultant for details!

Features:

- Stand-alone or place next to any keypad
- By simply pressing the status button, the Chatbak-V speaks to you in plain English, indicating system status, zone descriptions, alarms and emergencies
- Verbal Chime Mode – alerts you when someone enters or exits your home or business
- Message Center allows you to record and playback brief messages. Also notifies you of messages waiting upon disarming your system
- Hot buttons allow one-button arming in either the "away" or "stay" modes
