

HCD92534 True Day/Night IR Bullet Camera

High resolution video for indoor and outdoor surveillance

Honeywell's new HCD92534 True Day/Night IR bullet camera is the first of its kind to incorporate a powerful combination of infrared LEDs, True Day/Night functionality, 530 TVL, Digital Noise Reduction and Digital Slow Shutter. It provides high quality video in any location where surveillance may be hampered by low light. Even when you can't see what's happening, this camera can!

The new HCD92534 sets itself apart from other cameras by offering external controls to focus, zoom, and manage the OSD menu. All installation adjustments for the camera can be accomplished easily—without opening the housing! The HCD92534 provides dependable surveillance in extremely dark applications and offers the sharpest, most color-accurate performance available today. Super high resolution and Dynamic Noise Reduction offers reduced video noise for increased DVR storage time, and Digital Slow Shutter improves sensitivity to light outside the area illuminated by the infrared LEDs.

Market Opportunities:

The HCD92534 is designed for cost effective indoor and outdoor applications where object detection and recognition is essential. Whether the surroundings are in extreme low light or complete darkness, this camera is perfect for indoor and outdoor surveillance in:

- Residential applications
- Educational facilities
- Retail sites
- Commercial markets

CUSTOMER BENEFITS

- Installation and setup can be done quickly and easily
- Reduced video noise of low light images improves DVR storage time
- Increased low light performance

HCD92534 Features:

- External access to the On Screen Display menu, zoom and focus reduces installation time and simplifies the installation process
- Multiple white balance settings preserve color fidelity even under changing color and light
- Four DIP switches allow the camera to be configured to switch the IR filter at higher or lower light levels, depending on ambient light
