The Philips Pronto TSU9300 Control Panel is Here!

The Philips Pronto TSU9300 features a high-resolution flush-mounted 2.8" QVGA color touch screen. The superb contrast allows for easy reading, while the slim and ergonomic design makes it simple to operate with only one hand. With its bright touch screen, white back-lit buttons and stylish design, the Pronto TSU9300 is a perfect fit for any advanced home system.

The Pronto TSU9300 is WiFi-based and offers out-of-the-box integration with several audio servers such as Escient, Imerge and Windows Media Center Edition computers, offering a simple solution to manage even the largest digital music, DVD and CD collections. Not only can the TSU9300 control your audio-video equipment but it can also control the lights and shades via the Lutron RadioRa system.

To support total home control and multi-room wireless and wired remote control installations, the TSU9300 integrates seamlessly with two optional extenders: the RFX9400 wireless extender and the 19" rack mountable RFX9600 serial extender.
